Technical Data Sheet

Glue "For Decoration"

Environmentally friendly, solvent-free adhesive. Designed specifically for bonding decorative articles made of polystyrene, styrofoam, or any other lightweight construction. Recommended for indoor use. It has high adhesion to styrofoam.

DIRECTIONS FOR USE:

Clear the work surface from dust and moisture. Apply glue to the surface by the dots or stripes. It is recommended to be applied with a notched trowel. Firmly press bonding surfaces to each other and fix them in this position until the adhesive dries. Fixing time of glue is 5-10 minutes, the time of completely drying is 24-48 hours. Use at temperatures between +5°C to +40°C. Store in a cool, dry rooms and out of reach of children. Avoid direct sunlight and artificial radiation heaters.

PRECAUTIONARY MEASURES:

Store at temperatures between +5°C to +40°C, protect from frost.

Solvent-free, environmentally friendly.

The date of manufacture is indicated on the bucket.

Shelf life - 18 months.

TECHNICAL DATA:

NO.	Item	Data
1	Base	Acryl
2	Density	1,5 g/cm^3
3	Color	White
4	Skin formation	5-10 minutes
5	Curing time	12-24 hours
6	Bonding strength (wood-wood method)	8 kg/cm^2
7	Shelf life	18 months
8	Application temperature	from +5℃ to +40℃
9	Temperature resistance	from -25℃ to +80℃
